# MOBILE solutions

MobileTRKR

Rules Based Attendance Tracking for the Public Safety Workforce

Working in conjunction with *CourtNotify* or *Workforce Management PLUS*, the *MobileTRKR* solution can be used on any type of web-based device, regardless of location. Designed for the public safety workforce, the solution tracks personnel check-in and check-out times at scheduled events and captures event results. From day-of-court attendance, to academy training, or on-call rapid-response ... MobileTRKR is a cost effective means of capturing attendance results for analytical reporting.

Policy rules can be applied to *MobileTRKR* that ensure personnel are not checking into events too early or remaining at events too late. Geographical location data can also be applied to ensure that log-ins/outs are within close proximity of each scheduled event.
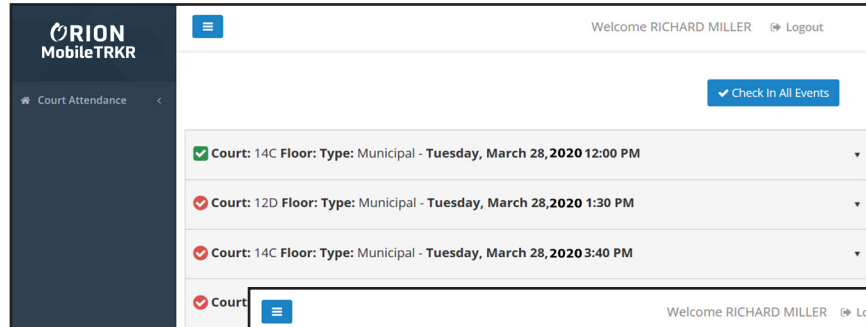

Personnel are added to *MobileTRKR* through their *Workforce Management PLUS* or *CourtNotify* account. Once access has been granted, employees receive a unique *MobileTRKR* registration code which is activated upon initial use of the solution. Access can be removed at any time by authorized agency personnel.

Contact us today at 866-779-1689.
