FOR IMMEDIATE RELEASE

Orion Communications Adds Mobile Attendance Tracking Software to Product Suite

Ensuring Attendance Accountability of Public Safety Personnel Regardless of Location

Dallas, TX (April 13, 2017) – Orion Communications, Inc., a leader in public safety workforce management software, has announced the addition of AgencyWeb® MobileTRKR to their product suite. Working in conjunction with Orion’s AgencyWeb® IWM and CourtNotify software, the new workforce attendance solution can be used on any type of web-based device, regardless of location. Designed exclusively for public safety, AgencyWeb® MobileTRKR will track public safety personnel check-in and check-out times at scheduled events and capture event results.

“Our vision is to continue adding relevant solutions that help public safety simplify their daily operational processes. This latest offering is an ideal complement to our workforce management software,” said Jackie Belasky, Director of Sales and Marketing at Orion.

“This initial release is focused on capturing officer’s court attendance, case results and dynamic court continuance management. The solution is designed to support a variety of event tracking applications that are unique for public safety, such as firearm range certification, fire volunteer station check in/out, training attendance and on-call rapid-response arrival and departure scenarios.”

Officers can log into AgencyWeb® MobileTRKR using any type of device with an internet connection. Agency-defined rules can be applied to control appearance login and logout times based upon event schedules and agency standards. If mobile devices are preferred, geographical location data can be applied to ensure that officer logins/logouts are within close proximity of their scheduled court events.

Final court case results quickly entered during checkout are captured and reported within AgencyWeb® IWM or AgencyWeb® MobileTRKR CourtNotify. Analytical reports can be generated to quantify court related overtime cost, case dispositions and officer appearance trends.

AgencyWeb® MobileTRKR can be purchased as a stand-alone product that works in real-time with the AgencyWeb® IWM workforce management solution and the AgencyWeb® CourtNotify solution.
