City of Seattle Fire and Police Departments Select Orion Communications' AgencyWeb® Workforce Management Solution

Dallas, TX (February 13, 2019) – Orion Communications, a provider of Public Safety workforce management software, announced today that the City of Seattle has selected Orion's AgencyWeb® solution to provide the City's Fire and Police Departments with scheduling automation software that will ensure optimal coverage of shifts while driving efficiencies and increased transparency in staff management. Orion's AgencyWeb® solution will be used to streamline business practices related to staffing and deployment of resources, including interfaces with the City's HR, payroll, and operational systems.

"We are delighted that our AgencyWeb® solution has been selected to drive staffing efficiencies throughout the City of Seattle's Fire and Police Departments," states Orion's President, Leslie DeLatte. "By using their own unique business rules to automate the system's scheduling intelligence, each agency will realize workforce productivity improvements and will use data-driven analytics for better resource planning and policy decision making."

The Seattle AgencyWeb® project kicked off in January 2019 with project completion scheduled for Q4, 2019.
